Now part of ALS

## **BioScreen Testing Services Acquired by ALS Limited**

On February 2, 2019, BioScreen Testing Services was acquired by ALS Limited – a global leader in laboratory testing, inspection, certification and verification solutions. BioScreen’s diversified portfolio fell directly in-line with ALS’ long-term vision of advancement in the pharmaceutical sector. With locations in Los Angeles, California and Phoenix, Arizona, BioScreen will bring a diverse set of services and capabilities to the ALS brand with major cosmetic, personal care, and pharmaceutical clients across the globe.

BioScreen, through the ALS USA platform, will expand under the leadership of its current EVP, Ranil Fernando. Ranil Fernando commented on the acquisition stating, “ALS’ acquisition of BioScreen provides an immense opportunity for growth for the business and unique services to the clients. With the backing and stability of one of the world’s leading testing companies, BioScreen customers will benefit from improved services, products and innovation. Similarly, the experience and relationships that we have cultivated at BioScreen will enable us to deliver one of the most unique testing models within the United States.”

ALS embraces our talent force of more than 110 highly qualified individuals, plus a leadership team with more than 80 years of combined experience in the clinical, analytical chemistry, and microbiology testing business. This includes key-players such as Operations Director Wendy Chang, Clinical Director Rania Ibrahim Ph.D., Director of Sales and Marketing Adam Rope, QA Director Eileen Camacho and Technical Director Mitchell Herbel Ph.D.

The acquisition of BioScreen supports plans for growth and maintains ALS’ position as the global testing provider of choice for those requiring multi-channel testing services. We are pleased to be a part of such a prestigious, global leader in testing, and we look forward to paving a continued path to success with ALS.
